

Tzero Table: The new HI-MACS® tables with green credentials

Franco Eccel presents “**Tzero Table – Made from HI-MACS®**”, a wide range of tables, coffee tables, kitchen work surfaces and items for the bathroom made from HI-MACS® Natural Acrylic Stone, and which are fully customisable in terms of size and shape.

The most notable feature of Tzero tables is their green credentials. They are created from offcuts and surplus materials taken from the sites of major architectural projects, and which are then given a second life in the form of highly unique and individual pieces, with a clear craft-based approach incorporating art and design features. Of special note is the ‘fragmented’ pattern, its origin and the underlying concept of the project, as well as the adhesives in contrasting colours, which, in the manner of the Japanese art of Kintsugi, clearly highlight the fractures between the individual elements and their joints.

In yellow, orange and blue, as well as red, white, grey and black, the HI-MACS® pieces, assembled like Lego® in a logical/geometric design, breathe life into tops and surfaces using an array of harmoniously balanced colours. These deliberately discordant elements are supported by aesthetically clean and minimalist bases available in beech, chrome or satin metal finish, or white or black varnish.

Thanks to the highly resistant nature of HI-MACS®, Tzero tables may be used either outside or in contract work. Acrylic stone is in fact highly resistant to bad weather, fire, impact and scratches, and due to the lack of pores on the surface of the material, dirt, moisture, mould and bacteria cannot gain a foothold.

This innovative, eco-friendly and customisable finish offers opportunities for the solid surfaces industry and for the most highly creative interior design projects.

Tables Tzeroquattro

Information on the project:

Design: Franco Eccel www.francoeccel.com

Models: Tzerouno 45/59 cm, Tzerotre.1, Tzerotre.2, Tzerotre.3, Tzeroquattro.4

Materials: HI-MACS®, Alpine White, Banana, Concrete Grey, Fiery Red, Deep Indigo, Orange, Sapphire - www.himacs.eu

HI-MACS® by LG Hausys

www.himacs.eu

HI-MACS® is a solid surface material that can be moulded into any shape. It is widely used for architectural and interior applications, such as sculptural and high performance wall-cladding or kitchen, bathroom and furniture surfaces, in commercial, residential and public space projects. It is composed of acrylic, natural minerals and pigments that come together to provide a smooth, non-porous and visually seamless surface which meets the highest standards for quality, aesthetics, fabrication, functionality and hygiene – offering manifold advantages over conventional materials.

HI-MACS® provides limitless possibilities for surfacing solutions and inspires creative minds from all over the world. **Zaha Hadid, Jean Nouvel, Rafael Moneo, Karim Rashid and David Chipperfield**, among others, have completed fabulous projects using HI-MACS®, from kitchens to bathrooms, including decorative items, in hotels as well as in museums, shopping centres and on external façades.

LG Hausys' HI-MACS® uses a simple heating process to give three-dimensional thermoplastic forming capabilities, allows visually seamless designs, offers a virtually limitless range of colours and – for some shades - exhibits a special translucency when exposed to light. Although HI-MACS® is almost as robust as stone, it can be worked in a similar way as wood: it can be sawn, routed, drilled or sanded.

HI-MACS® is manufactured using a new generation technology, the **thermal cure**. The temperature reached during the manufacturing process sets HI-MACS® apart from other solid surfaces and creates a denser, even more homogeneous, sturdy, durable surface – with a better resistance and superior thermoforming performance.

As regards hygiene, HI-MACS® does not absorb humidity, is highly resistant to stains, and is easy to clean, maintain and repair.

Countless internationally recognized certificates attest to the quality of HI-MACS® in terms of ecological commitment, hygiene and fire resistance – being the first Solid Surface in the market to receive the official **European Technical Approval (ETA) for façades** – for Alpine White S728 colour.

HI-MACS® offers the longest warranty on the solid surface market with a 15-year warranty for products fabricated by a Quality Club Member.

HI-MACS®. Because Quality Wins.
