

HIMACS for Signature Kitchen Suite at EuroCucina / FTK 2022

HIMACS was selected for the kitchen island material for the Seamless Natural Kitchen zone at the Signature Kitchen Suite Exhibition (Hall 15 - Stand G27 H26) at EuroCucina / FTK 2022.

LG Electronics presents the essence of its ultra-premium built-in kitchen appliance brand **Signature Kitchen Suite** at Milan Design Week 2022, the globally renowned design event anchored by the Salone del Mobile, from June 7-12. It offers a range of technologically advanced and stylishly designed products - such as cooking and refrigeration appliances - intended for the *True to Food™* theme.

Signature Kitchen Suite is participating in the 23rd edition of **EuroCucina / FTK** with a stand that, with four distinct kitchen spaces (*Seamless Natural Kitchen, Botanic Art Gallery, European Trendy Kitchen* and *Conceptual Kitchen*), will take

HI·MACS

visitors on a journey of discovery to explore all the latest products for the European market.

For the **Seamless Natural Kitchen** concept, Signature Kitchen Suite opted for the **HIMACS** Solid Surface, which has been used to create an elegant kitchen island with a built-in breakfast bar. The **Aurora Torano** finish gives the worktop a chunky, defined 'veined' effect, whereas the **Aurora Blanc** shade illuminates the perimeter of the kitchen island and the supporting leg of the breakfast bar, with its brilliant white and delicate tone-on-tone shades.

The decision to use HIMACS was easy. After all, the name of the concept kitchen itself refers to three of the extraordinary characteristics that make this Solid Surface the ideal material for a designer kitchen.

'Seamless' for uniformity and material continuity

HIMACS provides a surface that is smooth and silky to the touch, with no visible joins, ideal for quick and easy cleaning.

'Natural' for its natural beauty

HIMACS recreates the beauty of natural stone with the added bonus of high-tech innovative properties. This Solid Surface is easy to work with and can be moulded into any shape.

'Kitchen' for all your kitchen needs

Because of its non-porous design, HIMACS is perfect for use in the kitchen, it is an extremely hygienic choice. The Solid Surface is resistant to mould, dirt, viruses, bacteria, fungi and the intensive use of cleaning chemicals. The hygienic properties of HIMACS are certified by an independent laboratory in accordance with international LGA and NSF standards.

PROJECT INFORMATION

Project: Concept kitchen Seamless Natural Kitchen

Location: EuroCucina / FTK 2022 – Milan | Signature Kitchen Suite Stand (Hall 15 – Stand G27 H26)

Material: HIMACS Aurora Torano, HIMACS Aurora Blanc

HIMACS elements: worktop, cladding of the kitchen island and leg of breakfast bar

HIMACS. Because Quality Wins.

HIMACS Solid Surface

www.himacs.eu

HIMACS is a solid surface material that can be moulded into any shape. It is widely used for architectural and interior applications, such as sculptural and high performance wall-cladding or kitchen, bathroom and furniture surfaces, in commercial, residential and public space projects. It is composed of minerals, acrylic and natural pigments that come together to provide a smooth, non-porous and visually seamless surface which meets the highest standards for quality, aesthetics, fabrication, functionality and hygiene – offering manifold advantages over conventional materials.

HIMACS provides limitless possibilities for surfacing solutions and inspires creative minds from all over the world. **Zaha Hadid, Jean Nouvel, Rafael Moneo, Karim Rashid, Marcel Wanders** and **David Chipperfield**, among others, have completed fabulous projects using HIMACS.

At the forefront of innovation as always, LX Hausys recently introduced two new products. First **HIMACS Ultra-Thermoforming**, an innovative formula that pushes the boundaries of solid surface shaping to a whole new level, with 30% more thermoplastic capabilities - the biggest innovation for the Solid Surface history since its inception in 1967. Now, **HIMACS Intense Ultra**, combining the characteristics from two disparate worlds: **Intense Colour Technology** and **Ultra-Thermoforming**.

HIMACS uses a simple heating process to give three-dimensional thermoplastic forming capabilities, allows visually seamless designs, offers a virtually limitless range of colours and – for some shades - exhibits a special translucency when exposed to light. Although HIMACS is almost as robust as stone, it can be worked in a similar way as wood: it can be sawn, routed, drilled or sanded.

HIMACS is manufactured using a new generation technology, the **thermal cure**. The temperature reached during the manufacturing process sets HIMACS apart from other solid surfaces and creates a denser, even more homogeneous, sturdy, durable surface – with a better resistance and superior thermoforming performance.

HIMACS does not absorb humidity, is highly resistant to stains, and is easy to clean, maintain and repair.

Countless internationally recognized certificates attest to the quality of HIMACS in terms of ecological commitment, hygiene and fire resistance – being the first Solid Surface in the market to receive the official **European Technical Approval (ETA) for façades** – for Alpine White S728 colour. Furthermore, HIMACS has obtained the French **QB certification** and **CSTB ATec “Avis Technique”** for facade applications.

HIMACS offers a 15-year warranty for products fabricated by a Quality Club Member.
